

The TAP provides a wealth of support to Curvaceous Software users in their quest for process improvement and optimisation. C:Suite products include visual**Explorer** (CVE) process**Modeller** (CPM) and response-surface**Visualiser** (CRSV), which are encompassed by the underlying, award winning Geometric Process Control (GPC) technology.

This is an entirely novel and continually developing technology, so users benefit vastly from being members of the TAP due to offers such as free product upgrades and constant product support.

The TAP aims to maximise the transfer of knowledge, towards users, of our new analytical techniques as and when they emerge. Secondly we aim to enhance user satisfaction by minimising the time in turning our new developments into useful applications.

These goals are facilitated by the many TAP components outlined below. **The first year's TAP fee is included in all new License packages.**

- ✓ **Help, Advice and Support** – direct from our UK support desk
- ✓ **Product Service and Functional Upgrades** – FREE
- ✓ **Invitation to our Annual Technology Forum** – a major networking event
- ✓ **Training Classes** – an annual entitlement

Examples:     [Basic Training Class](#)  
                    [Advanced Analysis Workshop](#)  
                    [Late Starter and Refresher Classes](#)  
                    [Multi-Client Training Classes](#)

- ✓ **License Management Assistance** – making your licence mobile
- ✓ **Software Re-Configuration** – your demands change now so can your License

Examples:     [Software 'Trade-In' for CRSV](#)  
                    [Conversion of Individual CVE and CRSV Licences at the Bundle Price](#)  
                    [CPM Bundle mix of Network and Laptop](#)

- ✓ **Future Protection** – helping you get more in the future at less cost
